CORNERS

Lioher Simply Closets introduces a simple solution for corners by directly connecting the shelves of a module without side panel, to another module.

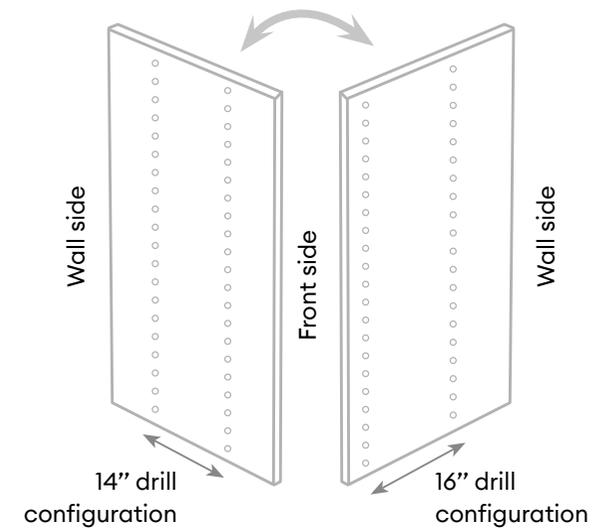

Here is an illustration on how to drill the connection holes.

Illustration

- 1  Mark the holes to drill, measuring from the panel side (Not the end of the shelf).
- 2  Drill the holes to the shelf front edge.
- 3  Insert two fixed pins.
- 4  Assemble the shelves to connect both modules.
- 5  Make sure the shelves are flush with the side panel edge.
- 6  Fix the toe kick using a corner bracket.

MATCH PANEL 14" / 16"

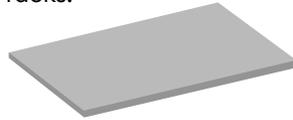

For tight spaces, Lioher Closets offer a 14" depth option that transitions to 16" depth to include drawers. To that effect, we offer a match panel pre-drilled for 14" depth configuration in one side and 16" depth configuration in the other.

Wall paneling / Backing

Lioher Closets don't offer the traditional backing panel. Instead, matching panels on 4' x 9' and 8 mm thickness are offered as a wall paneling solution before installing the closet. This solution allows for complete integration of the closet and an overall nicer look.
